

RUGGED INDUSTRIAL GRADE protection against the vagaries of voltage fluctuations on the input utility supply.

FEATURES

- **Automatic Voltage Regulation**
Step less automated voltage regulation - ideal for 95% of all applications.
- **Wide Range of Power Ratings**
Three Phase 500 to 3000 KVA
- **Broad Input Voltage Swing Ranges**
Input Swing - $\pm 10\%$ (S10), $\pm 15\%$ (S15), $\pm 20\%$ (S20), $\pm 25\%$ (S25) & $\pm 30\%$ (S30) - to specify.
- **High Efficiency**
Better than 97% for low running costs.
- **Precise Output Voltage Regulation**
Output Voltage Accuracy $\pm 1.5\%$
- **Transient Voltage Surge Suppression TVSS** - Protects loads against harmful high-energy surges, transients and spikes.
- **Independent Phase Balancing & Control**
Independent phase voltage sensing and control to ensure the individual phase voltages remain stable - regardless of load imbalance .
- **Inbuilt High Overload Capability**
Ideal for loads with an inherent initial high current draw on start up.

BRUSHLESS MAGNETIC INDUCTION DESIGN AC VOLTAGE STABILISERS & REGULATORS AC THREE PHASE - 500 TO 3000 kVA

IVSI

OIL IMMERSED DESIGN

MAXIMUM RELIABILITY FOR THE TOUGHEST OF APPLICATIONS

Designed for maximum reliability, making them ideal the toughest of applications, IVSI Brushless AC Automatic Voltage Stabilisers & Regulators enhance power quality, providing industrial - grade voltage regulation and power protection.

Typical Applications include -

- **Office Complexes & Buildings**
Building or whole floor voltage protection of computer and communication systems, elevators and lifts, lighting and environmental cooling/heating systems.
- **Manufacturing Plants & Production Processes**
Building or whole production line protection of industrial automation control, CNC and other heavy duty manufacturing load equipment. Ideal for applications in the Pharmaceutical, Petrochemical, Food Processing, Mining and Paper Mill industries.
- **Broadcasting**
Protection for TV, Radio and Communication transmitter sites and studios.
- **Medical Establishments & Equipment**
Building or floor wide protection of critical medical equipment and systems, including X-Ray, CAT Scan and MRI machines.

Where backup power is deemed unnecessary, or is derived from other sources, IVSI AC Voltage Stabilisers and Regulators deliver, for industrial and commercial buildings and their applications, a practical, efficient and cost effective solution to the power quality issues of Voltage Regulation and Power Protection.

- **Lightning Surge Protection**
Protection against extremely high voltage surges and transients caused by lightning strikes on the supply line.
- **Over / Low Voltage Alarm**
Audible alarm in the event of the input supply voltage going outside the input voltage window.
- **Phase Failure & Reversal Alarm**
Audible alarm in the event of phase failure or reversal.
- **Voltage & Current Metering**
Analogue metering of output voltage and loading with phase selector switches.
- **Remote Operational Status Monitoring**
No Volt Contacts delivering basic operational system status information for use by remote monitoring / building management systems.
- **Optional Main Switchboard (MSB)**
Floor Standing Main Switchboard with Input & Output Circuit Breakers, Manual Maintenance Bypass and Metering.
- **Compliance with International Standards**
Designed, manufactured and supplied to comply with leading international standards.
- **Warranty**
2 Years / 24 Months as Standard.

ADVANCED ROBUST BRUSHLESS DESIGN TOPOLOGY

IVSI Oil Immersed Voltage Stabilisers utilize Magnetic Induction Brushless Technology to deliver highly reliable and virtually maintenance free voltage stabilisation and protection. The oil immersion of the stabiliser considerably enhances the system's cooling efficiencies and as a result delivers, in terms of physical size, a highly compact solution – especially when compared to alternative air-cooled models.

As standard, all IVSI Voltage Stabilisers offer independent phase balancing and control ensuring that each phase voltage remains stable, irrespective of load unbalance – even for situations where a 100% load unbalance may exist.

As a Magnetic Induction based solution, IVSI stabilisers utilise a simple, yet highly reliable, rotor and stator design principle to increase or reduce the magnitude of the voltage in a series transformer winding, thereby delivering and maintaining a constant output voltage. The arrangement is similar to a motor, except that the rotor does not rotate continuously. Its maximum rotation is only 130 degrees. The magnetic coupling between the rotor (the shunt winding) and stator (series winding) will cause the magnitude of the voltage in the series winding to increase or decrease, depending on the angle or position of the rotor to the stator. For example, when the input voltage drops, the rotor will rotate clockwise to such an angle to make up for the drop in voltage, rotating anti-clockwise to correct for a high voltage.

VOLTAGE CHOICES AVAILABLE - H SERIES

4 WIRE SOLUTIONS THREE PHASE WITH NEUTRAL (4 WIRE SYSTEMS)

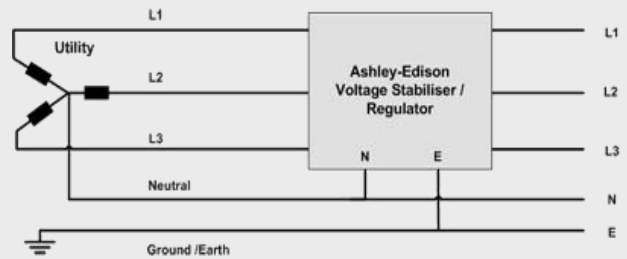

H SERIES

500 to 3000 kVA

High Voltage Models:

380/220V, 400/230V or 415/240V.
(440/254V or 480V/277V to Special Order)

Other voltages available on individual request / quotation.

INPUT VOLTAGE WINDOW OPTIONS - H SERIES

In situations where there is a reasonably good mains supply, a Stabiliser offering an input variation swing of $\pm 10\%$ (S10 Models) will usually be more than acceptable, but in more remote locations, or countries where the national supply infrastructure is less developed, variations of $\pm 15\%$ or greater may be needed to be accommodated by the Stabiliser.

Please Note – These Stabilisers are not designed to support / protect voltage “back feed” applications, where energy is required to be also fed back into the utility supply.

H SERIES - Three Phase Input Voltage Windows & Output Accuracy

Nominal Three Phase Voltage	Output Voltage Accuracy \pm % of Nominal	INPUT VOLTAGE SWINGS / SWING MODEL NO VARIANTS					
		Reading	S10 ($\pm 10\%$)	S15 ($\pm 15\%$)	S20 ($\pm 20\%$)	S25 ($\pm 25\%$)	S30 ($\pm 30\%$)
			500 to 3000 kVA	500 to 3000 kVA	500 to 3000 kVA	500 to 2500 kVA	500 to 2500 kVA
380V (L-N 220V)	$\pm 1.5\%$	Line to Line	342v to 418v	323v to 437v	304v to 456v	285v to 475v	266v to 494v
		Line to Neutral	198v to 242v	187v to 253v	176v to 264v	165v to 275v	154v to 286v

TECHNICAL SPECIFICATION

Technology:	Magnetic Induction Design - Brushless Oil Immersed
Input Voltage Swing :	±10% (or -12% +13% or -14% +16%) Three Phase, 4 Wire (3P+Neutral)
Output Voltage:	<p>Presetable for any voltage between 380/220V, 400/230V, or 415/240V - <i>Customer to Specify</i>, Three Phase, 4 Wire. (3 Phase + Neutral)</p> <p>440/254V & 480/277V models available to special order.</p> <p>The permissible input voltage swing is relative to the preset output voltage.</p>
Output Voltage Accuracy:	± 1.5%, ± 3% or ± 5 % - <i>auto selection based on input voltage swing.</i>
Frequency:	47 - 65Hz
Response Time:	<1.5ms
Correction Time:	A 10% supply variation will be corrected to within 2.5% in typically 0.6 to 1 second - <i>dependent on the selected permissible input voltage swing and system rating.</i>
Efficiency:	≥ 97%
Power Factor:	Any lagging to 0.95 leading
Surge Ratings:	<p>10 x max. current rating for 2 seconds</p> <p>3 x max. current rating for 1 minute</p> <p>2 x max. current rating for 2 minutes</p>
Surge Suppression:	TVSS - Protects loads against high-energy Spikes and Transient Voltages.
Total Harmonic Distortion:	Less than 1%

Independent Phase Control:	Maintains each phase voltage stable irrespective of load unbalance, even up to 100% load unbalance.
Environment:	Temperature range -15 to 45 °C. Derate by 2% for each additional °C Up to max 60 °C . Suitable for indoor tropical use 95% RH (non-condensing). Maximum altitude 1000m. Derate by 2.5% for each additional 500m.
Insulation Oil:	Uninhibited Transformer Oil conforming to BS EN 60296 (2004).
Construction:	Enclosures to IP20 (NEMA 1 Style) - BS EN 60529.
Paint Colour:	RAL 7032 (Grey - Epoxy Powder Coating)
EMC Conformance:	Complies with BS EN 55022 and the relevant parts of the BS EN 61000 series of standards.
CE Conformity:	CE Marked - being fully compliant with European Union Directives 2004/108/EC (The EMC Directive) and 2006/95/EC (The Low Voltage Directive).
Standard Warranty:	Two Years / 24 Months from date of supply
Standard Features:	<p>Loss of Phase & Phase Reversal Alarms</p> <p>Over Temperature Alarm</p> <p>Over Voltage & Low Voltage Alarms</p> <p>Voltmeter / Selector Switch</p> <p>Ammeter / Selector Switch</p> <p>No-Volt Free Contacts (N.C & N.O)</p> <p>Lightning Surge Arrestors</p> <p>Oil Pressure Safety Release Valve</p> <p>Supplied Oil Filled</p>
Optional Features:	Earth Fault Relay Alarm
Optional Main System Switch Board (MSB): <small>(3 Pole as standard with 4 Pole option)</small>	System Switch Board with - Input Circuit Breaker, Output Circuit Breaker, Manual Maintenance Bypass Switch & Metering & Interlocking Protection
